(57) Abstract:

PROBLEM TO BE SOLVED: To efficiently input a sentence at high speed by inputting the sentence by means of selecting a desired word with an input means among plural words displayed as menu items.

SOLUTION: A pressure sensitive tablet 9 arranged on the surface of a liquid crystal panel 8 generates a coordinate position signal showing the coordinate of 8 position by touching the surface with an input pen 25. The coordinate position signal is converted into digital data (coordinate position data) by an analog/digital converter 10 and it is sent to CPU 1. CPU 1 judges what kind of information is inputted from the input pen 25 based on the coordinate position of a display content which is actually displayed on
